The following is an examiner's statement of reasons for allowance:

Claims 1 and 8 recite a transport and storage container, for liquids comprises an outlet socket for receiving the tapping fixture, comprised of electrically conducting plastic material and connected to the permanently antistatic layer of the inner plastic container, wherein the outlet socket is fused to the permanently antistatic outer layer of the inner container. The references of record do not teach or suggest the aforementioned limitation, nor would it be obvious to modify those references to include such limitation.
